Applicant: Bengt Mannervik Attorney's Docket No.: 13425-169US1 / BV-1095 US

Serial No. : 10/534,998 Filed : November 9, 2005

Page : 2 of 6

## Amendments to the Specification:

Please delete previous abstract and add the following new abstract:

Glutathione transferase (GST), preferably GST A3-3, is identified as target for treatment of cancer and other diseases responsive to inhibition of steroid hormone production. A method for screening of compounds or drug candidates that modulate, preferably inhibit, the activity of GST is described.
